LANDSCAPE CENTER

Nature gives us all the natural beauty we need.

We landscape that beauty into a harmonious design.

Residential Landscaping

Trees, flowers, greenery of every imaginable type, grass, brick, wood, stone, water, in so many shapes, sizes, colors and textures, all gifts of nature to create landscaped settings of endless possibilities.

Perhaps it's a deep green lawn embellished with evergreens, dogwoods and accent border plantings; the eye drawn to a classic fountain. Or a flagstone path leading to a tucked-away place embraced by willows, cascading shrubs and planters bursting with coleus, ferns, and bright impatiens.

Or it might revolve around a larger place, where you can entertain family and friends on patios terraces adorned with ornamental grasses, hanging baskets, and a pond lush with floating water lilies, lotus and garden art.

Commercial Landscaping

Shopping malls, hotels, industrial parks, developments, etc., permit architectural landscaping in possibly its highest form. Designs may be highly formal and more open, with a neater appeal ... or less formal, more casual design. And we never ignore other important aspects of the project, such as minimally disruptive excavation and a well-designed water diversion system.

Your ideas brought to life...by design

Harmony doesn't just happen. It requires professional landscape design by people with the skills, experience, and knowledge of the products of nature that they're given to work with. Ultimately, it's you who defines the blending of visual appeal with space and place. It's a reflection of your lifestyle, your expectations, your space.

Step by step, the Galaxy Landscaping process begins.

We'll offer landscaping ideas that reflect your budgetary requirements

Our initial design consultation with you we get to view the space and visualize it in its final form. We'll offer landscaping ideas and costs matters.

Next, we'll prepare a layout of a proposed design to show you the flow of the landscape features and how they all come together as a total design. After your approval, the installation and landscaping begins. Once complete, a ground maintenance plan can be scheduled. You'll also have the peace of mind in knowing that all our work, from design to completion, to post-installation care, is designed with your goals in mind including our galaxy Guarantee.
